

Large-Cap Growth Disclosure

Year End	Total Firm	Composite Assets		Annual Performance Results			
	Assets (millions)	U.S. Dollars (million)	Number of Accounts	Composite		Russell 1000 Growth	Composite Dispersion
				Gross	Net		
2007	1,205	1.22	2	40.63%	39.62%	11.81%	0.20%
2006	918	4.43	Five or fewer	12.27%	11.38%	9.07%	N.A.
2005	823	12.36	7	9.61%	8.75%	5.26%	N.A.
2004	802	0.34	Five or fewer	16.44%	15.01%	6.30%	N.A.
2003	931	0.29	Five or fewer	27.42%	26.14%	29.75%	N.A.
2002	637	0.12	Five or fewer	(28.45%)	(29.46%)	(27.88%)	N.A.
2001	1,474	0.13	Five or fewer	(30.12%)	(31.09%)	(20.42%)	N.A.
2000	2,771	2.16	Five or fewer	(13.55%)	(14.57%)	(22.42%)	N.A.
1999	2,385	2.06	Five or fewer	53.48%	51.88%	33.16%	N.A.
1998	967	1.44	Five or fewer	49.69%	48.18%	38.71%	N.A.
1997	809	7.28	Five or fewer	34.43%	33.39%	30.49%	N.A.
1996	957	5.20	Five or fewer	13.16%	12.18%	23.12%	N.A.

N.A. - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

Insight Capital Research & Management, Inc.® (“Insight”) has prepared and presented this report in compliance with the Global Investment Performance Standards (GIPS®). Insight is an independent investment advisory firm registered with the SEC dedicated exclusively to the investment management business. Insight maintains a complete list and description of composites, which are available upon request. Results are based on fully discretionary accounts under management, including those no longer with the firm. Insight’s Large-Cap strategy commenced January 1, 1996. Compliance with the GIPS has been verified on a firm-wide basis from January 1, 2002 through December 31, 2006 by Ashland Partners and Company LLP. For the period January 1, 1989 through December 31, 2001, Insight was verified firm-wide by a previous verifier.

The 2008 gross and net quarterly performance, respectively, for the Large-Cap Growth Composite (“Composite”) is as follows: first quarter: -17.91% and -18.19% (preliminary). The Russell 1000 Growth Index returned -10.18% for first quarter.

The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income and dividends. Net of fee performance was calculated using actual management fees and when applicable, transaction costs. Gross of fee performance includes reduction for transaction costs, when applicable. Gross returns will be reduced by investment advisory fees and other expenses incurred in the management of the account. The annual Composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the Composite the entire year.

The Composite consists of discretionary equity accounts managed for Large-Cap growth seeking capital appreciation primarily through investing in stocks of well-established companies that provide long-term growth potential. This Composite may include accounts that utilize margin and returns have been stated back to an all cash basis. These accounts numbered five or fewer in any period. The Composite was created December 31, 2002. No guarantee can be made that the Composite performance is the statistically accurate presentation representing performance of any specific account, as specific account performance depends on investment timing, account specific guidelines and other factors that may

vary from account to account. Performance results in presentations prior to third quarter 2003 were measured against the S&P 500 Index. The benchmark was changed to be more representative of the Composite strategy. Information regarding the S&P 500 Index is available upon request.

The performance benchmark selected is the Russell 1000 Growth Index. This is believed to be the most appropriate index for comparison purposes. The index measures the performance of those Russell 1000 Index companies with higher forecasted growth values and higher price-to-book ratios. The Russell 1000 Index is a comprehensive large-cap index measuring the performance of the largest 1,000 U.S. incorporated companies. However, Insight believes that comparison of its performance to any one index is inappropriate because portfolios managed by Insight contain securities issued by companies with varying capitalization, may include both equity and cash equivalents, and are not as diversified as the market index shown. In addition, the index is not managed. Due to the differences between Insight’s investment strategies and the market index shown, Insight believes that no single index is directly comparable to the investment strategy of Insight.

The management fee schedule is as follows: 1.50% per annum for the first \$500,000, 1.25% per annum for the next \$500,000, 1.00% per annum for the next \$4 million and 0.75% per annum above \$5 million.

It is important to recognize that historical performance figures are for a limited time period and based on market conditions, economic factors and other variables that may not be duplicated during future periods. The results are based on the time periods as a whole, but results for individual months or quarters have been more or less favorable than the whole period. Future investments will be made under different economic and market conditions and in different securities. The information is historic and should not be taken as any indication or guarantee of future performance.

Additional information regarding the policies for calculating and reporting returns is available upon request.
